Hamworthy / Gardner Denver Compressors

Twin pack (2 compressors) for redundancy. Four stage. Pressure lubricated. Skid mounted with three sided enclosure. Complete with PLC controls. Captive blowdown vessel. Discharge oil separators and ESD emergency stop button. Maintenance and Parts manuals. These are high quality compressors manufactured in England and supported by Gardner Denver. The City of Kansas City has been operating these compressors successfully for many years filling storage vessels to fill vehicles.

The package was built for a customer that took delivery of it but never installed it. The package is new and has been in storage. It would give you redundancy and avoid service interruption when maintenance is due.

Startup service and training is also available.

Manufacture:	Hamworthy/Gardner Denver
Output:	70 CFM ea. total 140 CFM
